-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 4-7, 13-15, 19, and 20 are rejected under 35 U.S.C. 102(a) as being anticipated by Hakim (USPN 6,647,828).

Hakim discloses the claimed invention comprising a core (“HARD” portion indicated in Figure 6(A)) defining a longitudinally curved (as seen in Figures 1-3) scraper blade 18, having a scraper surface (edges of portion 18). The scraper surfaces of the blade are considered to be capable of scraping sweat from the body of an animal. The blade 18 is considered to have a tip at one free end and a handle 38 at an opposite end. A neck portion of the blade 18 extends, in a longitudinally curved manner, between blade center 24 and handle 38. A sheath (16 and “SOFT” portion in Figure 6(A)) extends along a length of the blade 18 defining a pair of V-shaped scraper blade edges (see Figure 6(A)). The sheath 16 is considered to envelope at least a portion of the neck portion.

The core is made of a first resilient material, i.e. polypropylene, and the sheath is made of a second resilient material, i.e. silicone or other elastomers (Hakim, col.2, ll.41-50).

Regarding claim 13, the blade 18 is considered to be trough-like.

Regarding claims 14 and 15, as seen in Figure 6(A) the sheath and core couple together in a tongue-and-groove-type interlock.

Art Unit: 3644

Regarding claim 19, the blade edges on opposing sides are substantially perpendicular.

Regarding claim 20, there is a substantially constant width for a majority of the length of blade 18.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hakim.

Hakim discloses the claimed device except the specific elastomer or rubber is not positively disclosed, Hakim only noted that other suitable elastomers may be used. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use thermoplastic vulcanite, or ethylene propylene diene monomer rubber and a polypropylene, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 4-7, 10-15, 19 and 20 have been considered, but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
